

STAGEPASS™ NEW!

IEM

Stereo Wireless In Ear Monitoring System

Enjoy the exciting performance of the StagePass™ IEM for your next gig. CAD Audio has been creating high-value product since 1931 and prides itself on supporting and developing the live performer. Our design criterion was straightforward: develop a high-performance wireless In Ear Monitor System that will deliver superior audio performance while supplying advanced frequency agility, capable enough to cope with today's dynamic RF environment—making it both easy to use and exciting to operate.

The StagePass™ IEM Stereo Wireless In Ear Monitor System features 16 channel frequency agile performance for outstanding connectivity. CADLock™ Automatic Tone Code Squelch eliminates unauthorized interference in RF unfriendly environments. Stereo operation lends flexibility of use—You may send discrete signals to the left or right channel. High performance MEB2 Monitor Earbuds are included to make your listening experience top flight. The MEB2 TruPitch™ Dual Armature Earbuds provide accurate audio reproduction while the EasyFit™ silicon earmolds provide a custom fit. The metal construction rack mountable transmitter is supplied with rack ears, half wave antenna, antenna relocation kit and sturdy carrying case.

Specifications	
Frequency	Q Band 470 498MHz
Audio Frequency Response	40Hz – 16KHz
Audio Input	Combination XLR - 1/4"
Dynamic Range	>101dB
Audio Output Power	100mw into 32 Ohm
Transmit power	30mW
AA Batteries with	>10hrs battery life
